DETAILED ACTION

Claims 22-57 are pending and examined.

Claim Rejections - 35 USC § 103 Withdrawn

In view of Applicant's arguments the rejection over WO 92/21229 (Amgen) in view of Iida et al is withdrawn.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 22-57 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6,361,769. Although the conflicting claims are not identical, they are not patentably distinct from each other because the method of stimulating host defense mechanisms comprising

Art Unit: 1614

administering interferon via oromucosal contact of '769 includes treating a viral infection recited in the instant application.

Claims 22-32, 36-52 and 56-577 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 3-15 of U.S. Patent No. 6,207,145 and claims 1-14 and 16 of U.S. Patent No. 5,997,858. Although the conflicting claims are not identical, they are not patentably distinct from each other. The method for treating a neoplastic condition comprising administering interferon via oromucosal contact of '760 and '858 render the instant method obvious when the method is used to treat a neoplastic condition caused by a virus.
